## ROCKPANEL Woods: a durable alternative

ROCKPANEL Woods is an effective and durable alternative to real wood with environmental credentials which are second to none. Only 1 m<sup>3</sup> of the natural and sustainable resource, basalt, is needed to produce more than 400 m<sup>2</sup> of board material. Besides that ROCKPANEL Woods can be recycled. For a design approach committed to the environment, ROCKPANEL Woods is the natural solution.

Set your creativity free with 16 sparkling designs, each offering an astounding play of colours. Sunlight or artistic spot-lighting further enhances the radiance of your building. As the light constantly changes throughout the day, the façades' appearance reflects that in intensity and hue.

# Design range

A bold statement can be created with ROCKPANEL Chameleon, allowing designers to create buildings that catch the eye and tell their own story.

# Let nature do her work

The purest version of our board material is ROCKPANEL Natural. With natural weathering from sunlight and the elements, the appearance of this hard-wearing, unpainted board material changes. Let nature do her work in the design of your building.

The ageing effect is influenced by the elements of nature and differs due to artificial conditions even at micro level. Therefore the exact ageing and uniformity of the effect can not be predicted.

For a perfect final result with ROCKPANEL Natural it is important to work carefully during application and in detailing. For more information check the product datasheet Natural on [www.rockpanel.com](http://www.rockpanel.com).

## Dimensions

Panel thickness	Durable: 8 mm or 10 mm Xtreme: 8 mm or 10 mm (from 100 m <sup>2</sup> )
Panel width	1200 mm (1250 mm from 100 m <sup>2</sup> )
Panel length	3050 mm or 2500 mm

*ROCKPANEL boards can be supplied in alternative sizes, thus minimising wastage and unnecessary cost. See page 39 for details.*

## Technical implementation

- Durable** for use in regular façade and roofline applications.
- Xtreme** for use when a greater degree of impact resistance is required, usually towards ground-level.

## Availability

- ROCKPANEL Natural in width 1200 mm are a stock item, orders over 100 m<sup>2</sup> are subject to a maximum lead time of 6 weeks.
- ROCKPANEL Natural in width 1250 mm are available from 100 m<sup>2</sup> with a maximum lead time of 6 weeks.
- The version Xtreme is available from 100 m<sup>2</sup> with a maximum lead time of 6 weeks.

## Flexible mounting Lines<sup>2</sup> 8 using the clip

Fixed installation

Demountable installation

To make the fitting of tongue-and-groove panelling more simple and to improve post installation maintenance, ROCKPANEL Group has developed an innovative clip. The clip ensures that the supporting structure is ventilated even more effectively, reducing moisture retention, and thus increasing the structure's durability. The mounting clip is mandatory for a correct installation of ROCKPANEL Lines<sup>2</sup> 8.
