

Cut to size with the highest degree of accuracy

Materials:

1,500m² Rockpanel Colours - various

Fixing System:

Rivet fix to helping hand system

Architect:

Space Architects

Main Contractor:

Galliford Try

Brief:

A cut to size project with the highest degree of accuracy to ensure these bright choice of facade panels looked their very best.

Challenges:

Limited space on-site required a phased delivery approach

How VIVALDA assisted:

VIVALDA cut the panels to size and pre-drilled all the fixing holes accurately, offering a phased delivery to suit the build schedule. VIVALDA additionally offered onsite assistance to advise and support on elements of the installation.

VIVALDA

VIVALDA are proud to fabricate and supply the Wold Primary and Infant School in Hull, which is part of a wider £23 million regeneration programme under the government funded 'Priority Schools Building Programme'. Under this scheme, VIVALDA will further be supporting the facade requirements for the Ainthorpe Primary, Francis Askew Primary and Eastfield Primary Schools.

Rockpanel Colours was the facade of choice and well suited to create a bright and colourful atmosphere to enhance the pupils learning experience. Even the pupils were instrumental in the choice of colours for their new school, resulting in the creation of three outdoor learning areas and a library.

Rockpanel Colours offer more choice than ever with the release of additional standard and special colours, taking the range up to 144. The standard panels in this range offer the fire rating of B-s1,d0 making Rockpanel the ideal choice for safety - without compromising on design.

VIVALDA Hull were appointed to cut the panels to the varied sizes and further drill the fixing holes on each component panel as specified. Materials were then palletised

as per the contractors instructions and delivered in phases.

A phased delivery was essential to the project due to the limited space on site. VIVALDA Hull were able to meet this requirement with ease due to the ample and spacious warehouse facility. Panels were packed and labelled to instruction therefore making it a seamless and speedy installation.

Our highly skilled professionals at VIVALDA Hull offered valuable onsite assistance during numerous site visits. We were able to support and oversee the installation of the panels to ensure a safe and professional finish.

VIVALDA Hull now look forward to the final results for the remaining schools under this project with Galliford Try. We have been heavily involved with numerous Priority School Buildings. Under this major government scheme, schools that are in the poorest state of repair are drastically improved.

2017 sees VIVALDA supporting the fabrication and supply of facades for the government funded 'Priority Schools Building Programme.' Read our other case studies which include Samuel Lister Academy, Beckfoot Upper Heaton, Deans Trust Academy and Neasden Primary.
