

Working to a demanding schedule to get the job done

Materials:

2,000m² of Trespa Pura NFC and 150m² of Trespa Meteon Lumen.

Fixing System:

Trespa universal click system for flush siding (Pura NFC)
Mainline rivets (Lumen)

Architect:

Rawls

Main Contractor:

Alderclad Ltd

Brief:

Due to limited site space, a phased call-off of cladding panels with precise delivery times was required.

Challenges:

Working to tight turnaround times at each phase

How VIVALDA helped:

VIVALDA Hull comfortably delivered the panels over the course of a five month period, without any issue.

VIVALDA

The Dalton Park complex is the biggest outlet shopping centre in the North East, with over 60 shops selling over 200 different brands and designer labels. As part of a £45 million expansion plan the architects opted for a facade overhaul, with Trespa being the manufacturer of choice.

Working closely with Trespa to achieve a competitive quote, VIVALDA Hull were the chosen suppliers to procure a sizeable 2,000m² of Trespa Pura NFC in 'Core Ash'. Whilst a relatively new product to the established Trespa range, Pura NFC impressed the clients as an easy to install click system facade which offers the benefit of a flush finish.

In contrast to the wooden tones of Trespa Pura NFC, parts of the complex were clad in the ultra-modern and contemporary Trespa Meteon Lumen. This exciting facade offers multiple dimensions to a surface by 'playing' with compositions of light.

VIVALDA were aware that the delivery schedule for the panels was going to be demanding. Therefore on this project, VIVALDA were in regular contact with the customer to get updates on the progression of the job. Due to only having limited storage on-site, VIVALDA received multiple

call off requests for pallets from July 2017 until project completion at the end of November.

"This was an exciting project to be part of, so with a little pre-planning of our own warehouse schedule, we were happy to accommodate and work to the tight turnaround times provided by our customer". Craig Matson, Regional Director for VIVALDA.

As installation of the panels was done in the evening to avoid shopper disruption, timely delivery was imperative, ensuring panels were available on demand.

Trespa Pura NFC smart cladding solutions consist of sidings, fasteners and matching accessories - all available from VIVALDA. For a high impact environment such as a shopping centre, facade durability is key, which is why the Sidings undergo extensive testing for impact and comes with a 10 year product guarantee.

Thinking about using Trespa Pura NFC?
Contact VIVALDA for more information on this smart cladding system - available in both flush and lap finishes in a variety of wood and uni colour decors.
